Fall 2014 Graduate Course Announcement

Arch-595IN

Integrated Design and Construction of Buildings

Course Information:
CRN: 31402
Class Time: 3:30 to 6:20 PM Tuesdays only
Location: Room 152 Wohlers Hall
Credit: 4 hours
Enrollment Limit: 45 students

Course Contents:
Integration of the various disciplines involved in the development, planning, design, construction, and operation of buildings. Course features presentations by faculty and teams of professionals on different phases of design and construction of buildings of various types and sizes. Additional presentations include such topics as legal issues, operation and management, forensics and other subjects as they relate to design.

Pre-requisite:
Graduate status in the School of Architecture. Other interested students must consult with Prof. Aminmansour before registering.

Course Organization:
The course will consist of presentations given by faculty and professionals. There is no textbook for the course. However, handouts will be given as appropriate. Attendance in lectures is very important.

Course Instructor:
Prof. Abbas Aminmansour
