**Instructors:** Brian Deal ([deal@illinois.edu](mailto:deal@illinois.edu))  
**Credits:** 4 Hours  
**Prerequisite:** Graduate or Senior standing

---

**Course Description**

Examination of sustainability issues of concern to planners (from a climate change perspective) including conflicts among interests such as resource conservation, urban growth, environmental justice, industrial development, social equity, sustainable agriculture, and economic development, among others. Holistic approaches combining urban and regional land use, physical design, and policymaking are examined, ranging from theoretical concepts to detailed case studies.
